

Environmental Policy Statement

LARSA is dedicated to reducing both the direct and indirect environmental impacts of its business activities. By adopting sustainable business practices, we aim to increase operational efficiency while significantly reducing our carbon footprint. We are committed to meeting—and wherever possible, exceeding—all applicable environmental legislation, client expectations, and regulatory requirements that govern the impact of our operations.

This policy outlines our core commitments to sustainability, reflecting our responsibility to protect and preserve the environment for future generations:

1. **Minimizing Environmental Impact**

We will actively work to reduce waste, energy consumption, and emissions across all business operations, striving for environmentally responsible practices in every aspect of our work.

2. **Sustainable Business Practices**

We will integrate sustainability into our business processes, from procurement to production, ensuring that our practices promote long-term environmental health while enhancing operational efficiency.

3. **Compliance and Leadership**

LARSA is committed to strict adherence to all environmental laws and regulations. Moreover, we will seek opportunities to go beyond compliance, setting a higher standard of environmental stewardship within our industry.

4. **Continuous Improvement**

We will regularly review and refine our environmental policies and practices, leveraging innovation and technology to continually improve our environmental performance.

Through these efforts, LARSA aims to play an active role in safeguarding the environment for future generations while fostering a sustainable, efficient business model.
